

WELCOME TO HEALING HANDS INSTITUTE

I am inspired by our school, our students, our faculty, our past and present. Healing Hands Institute offers an exceptional learning environment in which students gain the knowledge and skills they need to be leaders and thinkers in today's world. The core of our academic community is our strong faculty who are dedicated to our students. Like scholars at other top institutions, HHI professors are constantly updating with the most current literature to facilitate the learning process in their respective disciplines. However, our professors are unique in their commitment to teaching integrating different practical and theoretical modalities. This dedication allows students to experience a rich and thought-provoking classroom discussion as well as meaningful interaction with faculty outside class. Students who graduate from our institution are well equipped to interact with individuals from all backgrounds and cultures, to think creatively about solving complex problems and to understand our rapidly changing global society.

The passion of our faculty is perhaps only rivaled by the intellectual curiosity of our students. Our community is diverse and vibrant. We are a small school, because only in a small community can we truly treat all members as individuals. This is an adventurous place that challenges students while also providing them with a plethora of experiences for personal growth and enrichment. I believe that students will thrive in this environment.

When you visit our school, you will discover what makes HHI a strong candidate to choose. In the meantime, continue to look through our website to gain information about our offerings and see what makes this institution unique. If I can be of help to you, please do not hesitate to contact me with any questions or concerns.

With warm regards,

*Dr. Beatriz Muse
President*
